EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dolph Torrence on 2/16/06.

The application has been amended as follows:

Claim 10, line 3, "a square drive adjacent the grip portion" has been changed to ---a square drive directly adjacent the grip portion---;

Claim 10, line 6, "mounting lug including a cylindrical end portion;" has been changed to ---mounting lug further including a cylindrical end portion extending from the square drive;---.

Allowable Subject Matter

Claims 10 and 14-17 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach the first and second claws attached to the cylindrical body in parallel, spaced relation, each of the claws having a pair of jaws dimensioned and configured for simultaneously gripping coaxially aligned nuts of a T-connector in order to prevent rotation of the T-connector when adjusting a nut on stem of the T-connector.
